

# Designing Urban Transformation

## By Aseem Inam

"This book is a stunning manifesto for critical global urbanism in the 21st century." — Sharon Zukin, author, *Naked City: The Death and Life of Authentic Urban Places*

While designers possess the creative capabilities of shaping cities, their often-singular obsession with form and aesthetics actually reduces their effectiveness since they are at the mercy of more powerful generators of urban form. In response to this paradox, *Designing Urban Transformation* addresses the incredible potential of urban practice to radically change cities for the better. The book focuses on a powerful question, "What can urbanism be?" by arguing that the most significant transformations occur by fundamentally rethinking concepts, practices, and outcomes.

Drawing inspiration from the philosophical movement known as Pragmatism, the book proposes three conceptual shifts for transformative urban practice: beyond material objects: city as flux; beyond intentions: consequences of design; and beyond practice: urbanism as creative political act. Pragmatism encourages us to consider how we can make deeper and more systemic changes and how urbanism itself can be a design strategy for such transformations.

Analyses of transformative urban initiatives and projects in Barcelona, Belo Horizonte, Boston, Cairo, Karachi, Los Angeles, New Delhi, and Paris illuminate how these conceptual shifts operate in vastly different contexts. The book is a rare integration of theory and practice that proposes essential ways of rethinking city-design-and-building processes, while drawing critical lessons from actual examples of such processes.
